Network

Manager's Lowdown

This last year presented us with many great accomplishments and opportunities. Some of the best accomplishments from 2015 were the creation of a landmark return on investment (ROI) study, the framework for a strategic plan that will take us a decade into the future, the transfer of many of our services to the Microsoft Hyper-V virtual server environment, the creation of a draft Request for Proposal (RFP) for a new Integrated Library System (ILS), the completion of adding the Mingus Union High School as the newest member of the YLN, a long awaited upgrade to our Remote Patron Authentication (RPA) software, the transfer of all YLN hardware from PPL to the County Administration building on Fair Street, the transition from our Circ-IT RFID system to the Circ-IT NXT RFID system, and several upgrades to our Symphony suite of software.

We at YLN are looking forward to an equally productive 2016. Some major projects will be started and/or completed. A sampling are as follows:

The possible transition to a new integrated library system (ILS). The contract we currently have with SirsiDynix will expire in June of 2017. Currently an RFP is being drafted by the RFP committee in an attempt to ensure our needs are met if we decide to transition to a new system. The RFP will be a comprehensive document to ensure the process is competitive. If we select a vendor other than SirsiDynix the migration will start in July of this year.

The Network is also going to look into the feasibility of a Network-wide contract with Baker and Taylor. The Network has long desired such an agreement and now is the perfect time to start pursuing since the Library District needs a new contract with Baker and Taylor.

We are going to be moving to the forefront of library technology by implementing BlueCloud Visibility which uses Bibframe and linked data to make our title information available on search engines such as Google. Patrons should be able to see results to a search in Google now and not just in our online catalog.

The Public Services Committee is also going to start looking into implementing an electronic materials collection development best practices and/or policy Network-wide. This will help to improve the patron experience on the digital frontier.

We will also start actively implementing our strategic plan which has almost been one year in the making. There are definitely some exciting opportunities presenting themselves for 2016.

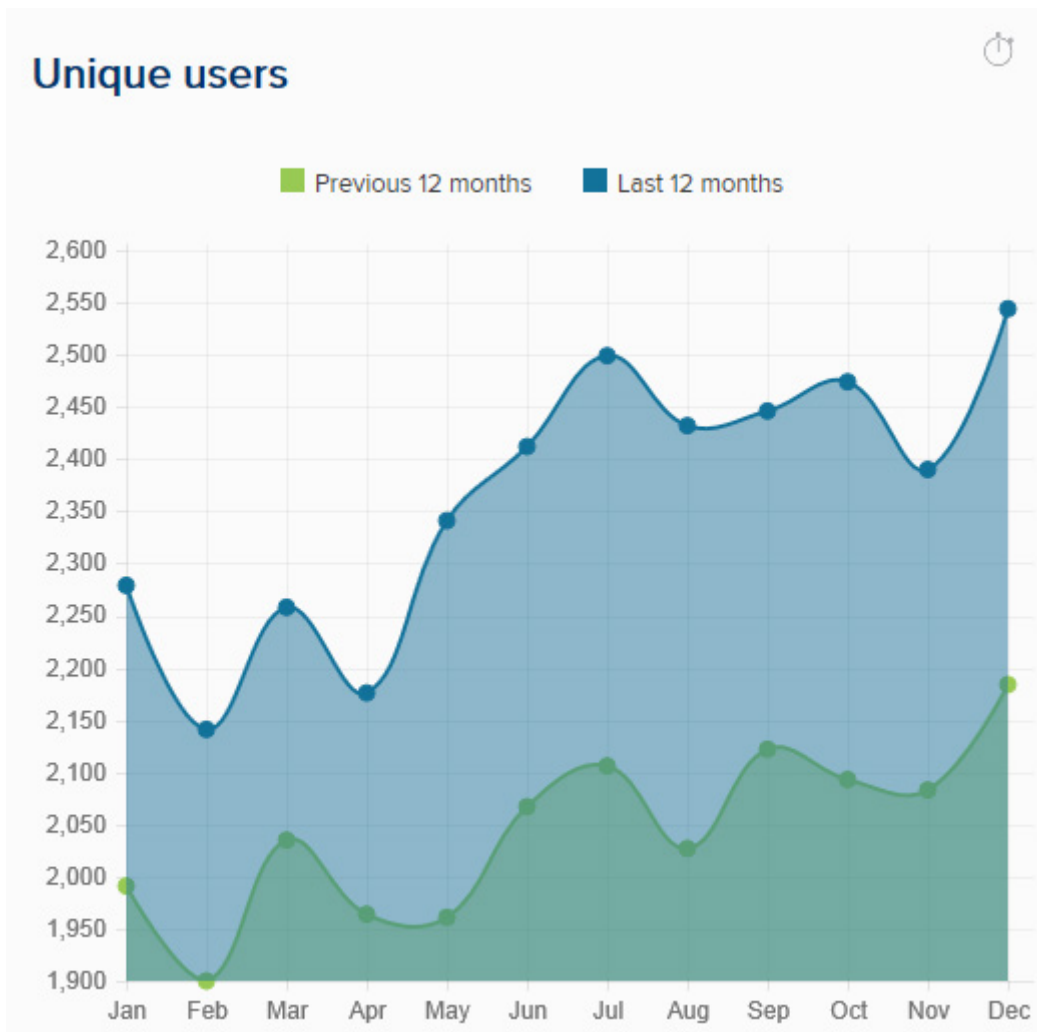

Respectfully Submitted,

Corey Christians
Library Network Manager

Overdrive Growth

2014 compared to 2015

Prioritization

Priority One: Resolve Current Helpdesk Requests

A help desk request, or work order, is the submission of a problem that one encounters during the normal operation of a YLN service. Requests are generally submitted via e-mail to help@yln.info. If a request is submitted via telephone, then a YLN staff person will create the request for the submitter. Help desk requests will always be our highest priority because in some cases a member library employee cannot complete a work function until the issue is resolved.

Total requests submitted: 54

Total requests resolved: 65

Total unresolved requests opened this month: 2

Total requests still open: 24

Priority Two: Draft and RFP for a new Integrated Library System

The time is here to start looking into purchasing a new Integrated Library System (ILS). Stage one is sending out the RFP.

Goal: Create a request for proposal for a new integrated library system.

Project Lead: Corey Christians

Progress:

- Install a wiki that can be used to gather information about what we want in a new ILS
- Test the wiki to make sure it works
- Send instructions out on how to use it
- Start having meetings to determine what we want in a new ILS
- Compile the results and add them to the wiki
- Form an RFP committee
- Survey the current ILS market
- Start work on the RFP
- Create a draft RFP
- Send the RFP out to the membership for comment
- Create the final draft
- Seek steering committee approval
- Distribute to all interested vendors

Priority Three: Migrate vhosts from VMWare ESXi to Microsoft HyperV

Currently several servers are running virtually on a VMWare ESXi virtual host. Some of them include the YLN website, RPA, EZproxy, DNS, and many many more. The YLN will be switching to Microsoft HyperV in order to increase data redundancy and to increase support availability. The MIS Operations team also uses HyperV which will allow deep support with this product. This will require purchasing a new server, migrating current virtual servers and converting existing virtual hosts to HyperV.

- Determine if HyperV will work in our Linux/Windows environment
- Spec out a new server that can house all existing virtual servers as well as any future servers.
- Receive approval to purchase the new server
- Order new server
- Receive the new server
- Migrate existing ESXi virtual servers to HyperV
- Wipe ESXi servers and install HyperV
- Set up the new server to back up to the old servers

Priority Four: Install BlueCloud Analytics

Currently the YLN uses Director's Station for all web-based statistical reporting. BlueCloud Analytics is meant to be a replacement for Director's Station. However, the products differ greatly. Because of this we have been holding off migrating to the new product until its functionality matches Director's Station.

Goal: Complete the transition to BlueCloud Analytics

Project Lead: Chanel Wheeler

Progress:

- Upgrade our BlueCloud framework to accommodate analytics
- Install BlueCloud Analytics.
- Create several test reports to verify functionality
- Create templates to match DS reporting
- Train member libraries once transitioned to BCA

Note concerning prioritization: The priority of projects may shift as individual portions are completed.

Prioritization

Priority Five: YLN Strategic Plan

While the YLN has been very good about technology planning, the overall vision and strategy of the YLN has been more elusive. The Executive Committee has been working on developing a vision, mission, and strategic plan.

Goal: Develop a strategic plan that will bring the YLN to the year 2025.

Project Lead: Corey Christians

Progress:

- Create a way to implement the plan
- Get approval for the updated plan
- Change the bylaws if necessary
- Distribute the new plan

Priority Six: Network-wide Electronic Resources

In order to address the burgeoning usage of electronic materials the Public Services will take the lead on looking to creating a Network-wide e-materials collection development policy or best practices document.

Goal: Discover a method to increase utilization, improve the customer experience, and increase acquisitions fairness throughout the Network.

Project Lead: Corey Christians

Progress:

- Conduct initial research into what potential problems may be resolved Network-wide.
- Get approval from the Steering Committee to pursue a solution with the Public Services Committee
- Work with Pub Serv to define problems.
- Create a subcommittee to create a plan
- Pub Serv approve plan
- Steering Committee
- New plan is implemented.

Priority Seven: SirsiDynix Supported Servers End-of-Life

After a certain amount of time vendors will no longer support hardware because it is considered outmoded. In other words parts become hard to find because they are no longer manufactured. Our servers will have this problem as of May 31st, 2016.

Goal: Have a solution in place to deal with outmoded hardware.

Project Lead: Corey Christians

Progress:

- Determine differing solutions to the problem considering we may be on a new ILS in two years.
- Present the solutions to the Executive Committee
- Present the solutions to the Steering Committee
- Analyze which option is superior based on cost and stability
- Purchase any equipment that is required
- Migrate data and go into production

Priority Eight: Implement BC Visibility

BlueCloud Visibility is a new product by SirsiDynix which converts our online catalog to a linked data model. This will make our records visible in search engines such as Google.

Goal: Implement BC Visibility

Project Lead: Chanel Wheeler

Progress:

- Receive a quote from SirsiDynix
- Get approval for the purchase
- Receive an implementation plan from SD
- Offload our bibliographic database to SD to be processed.
- Test the implementation.
- Go Live and an invoice sent to YCFLD
- Advertise the new service

Prioritization

Priority Nine: Implement Blue Cloud Cataloging

Blue Cloud Cataloging will allow library staff to access Symphony cataloging from a web browser. The new product should have significant user interface improvements above the cataloging section in Work Flows.

Goal: Fully implement Blue Cloud Cataloging (BCC)

Project Lead: Chanel Wheeler

- Upgrade Web Services so we can use BCC
- Configure Web Services for the new service
- Test BCC to see how it works
- Create documentation
- Activate it for a test library to see how it works in a production environment
- Conduct a training session for all YLN users
- Activate it for the remaining libraries

Completed Projects CY15

- Value of Services for YLN
- Add MUHS
- Complete overall strategic plan
- Upgrade CircIT NXT
- Create OPAC Enhancements
 - Make it so the UPC retrieves cover art
 - Make it so ICat1 displays item format
 - Make it so second UPC shows cover art
 - Make it so the book river shows cover art
 - Determine if online registration is feasible
 - Fix reserve item searching for YCV
 - Add icons for ICat1s that don't have them
 - Add (item) details button to search results
 - Add the ability to add local cover art
 - Always have location listings expand
- Move Servers to County Admin Building
- Complete the LSTA Synrg 2 grant process
- Upgrade RPA
- Pay the SD maintenance bill
- Gather State Data Report Statistics

Cancelled/Postponed Projects CY15

- Install the Bookmyne Mobile App
