Report

## Manager's Lowdown

The next phase of the ILS proposal process has been completed. Thanks to the expertise and guidance of Kristina Jezarian, Michael Holmes, and Barbara Kile I was able to draft an example contract. This contract will give the vendors a good idea of what we are expecting in price, performance, capability, and support from a vendor. Preparing the contract now also opens up a lot of time near the end of the competitive process to work on other portions of the process.

According to the timeline established vendors will have until the 4th to pose questions to the YLN. The YLN will then have to respond to those questions by the 11th. April will be when YLN activities ramp up again. The RFP committee will have the task of reviewing all of the proposals that are to be unsealed on April 5th at 2:00 PM.

The RFP committee will then make their recommendations to the Steering Committee on who they believe the top three vendors should be. The Steering Committee will then vote on the selection. Scripted vendor demonstrations will then take place on site. Any staff of any YLN member library may attend the onsite product demonstrations. If you decide to attend one of more of the onsite demonstrations you will be given a survey to rate the performance of certain features. At the end of the demonstration the survey will be turned into YLN staff.

Based on the information provided in the surveys plus other factors brought up in the proposal a final vendor will be selected. The RFP committee will also discuss each vendor with each committee. Based on all the available input a final recommendation will be made by the RFP committee and submitted to the Steering Committee for final approval. That is a rough outline of what will occur in the coming months as far as the RFP is concerned.

I have also been looking into purchasing new hardware to run Symphony. Switching servers may become necessary since our servers are going to end-of-life in May. When a server end-of-lives it simply means the vendor, in this case Dell, will no longer support that server. The servers in questions may run just fine for months or years without any support.

My preference would be to replace the servers just in case a problem does arise. If we replace the servers we would run several Symphony-related servers in a virtual environment utilizing VMWare since SirsiDynix does not support their software running in a HyperV environment. Right now SirsiDynix is investigating whether or not they will provide the transfer at no cost to us. A provision in our contract does seem to support this occurring at no cost to us. If the transfer does occur there will be an interruption in services during the transfer. More information will be forthcoming once a direction is decided.

Respectfully Submitted,

Corey Christians  
Library Network Manager

# Prioritization

## Priority One: Resolve Current Helpdesk Requests

A help desk request, or work order, is the submission of a problem that one encounters during the normal operation of a YLN service. Requests are generally submitted via e-mail to help@yln.info. If a request is submitted via telephone, then a YLN staff person will create the request for the submitter. Help desk requests will always be our highest priority because in some cases a member library employee cannot complete a work function until the issue is resolved.

**Total requests submitted:** 65

**Total requests resolved:** 62

**Total unresolved requests opened this month:** 1

**Total requests still open:** 32

## Priority Two: Draft an RFP for a new Integrated Library System

The time is here to start looking into purchasing a new Integrated Library System (ILS). Stage one is sending out the RFP.

**Goal:** Create a request for proposal for a new integrated library system.

**Project Lead:** Corey Christians

### Progress:

- Install a wiki that can be used to gather information about what we want in a new ILS
- Test the wiki to make sure it works
- Send instructions out on how to use it
- Start having meetings to determine what we want in a new ILS
- Compile the results and add them to the wiki
- Form an RFP committee
- Survey the current ILS market
- Start work on the RFP
- Create a draft RFP
- Send the RFP out to the membership for comment
- Create the final draft
- Seek steering committee approval
- Distribute to all interested vendors

## Priority Three: Create a Short List of ILS Vendors

The next step in the RFP process is to evaluate the proposals once they are received and determine which three products will be evaluated onsite.

**Goal:** Determine which three products will make the short list.

**Project Lead:** Corey Christians

- Receive the sealed proposals
- Open the sealed proposals
- Compile the proposals into one reviewable document
- Create a criteria for proposal evaluation
- Determine which vendor offerings best meet the established criterion
- Create a report detailing the final three selections
- Present the results to the Steering Committee
- Get Steering Committee Approval
- Create a demo script and distribute it to vendors
- Invite the selected vendors onsite for a demo

## Priority Four: Install BlueCloud Analytics

Currently the YLN uses Director's Station for all web-based statistical reporting. BlueCloud Analytics is meant to be a replacement for Director's Station. However, the products differ greatly. Because of this we have been holding off migrating to the new product until its functionality matches Director's Station.

**Goal:** Complete the transition to BlueCloud Analytics

**Project Lead:** Chanel Wheeler

### Progress:

- Upgrade our BlueCloud framework to accommodate analytics
- Install BlueCloud Analytics.
- Create several test reports to verify functionality
- Create templates to match DS reporting
- Train member libraries once transitioned to BCA

Note concerning prioritization: The priority of projects may shift as individual portions are completed.

# Prioritization

## Priority Five: YLN Strategic Plan

While the YLN has been very good about technology planning, the overall vision and strategy of the YLN has been more elusive. The Executive Committee has been working on developing a vision, mission, and strategic plan.

**Goal:** Develop a strategic plan that will bring the YLN to the year 2025.

**Project Lead:** Corey Christians

### Progress:

- Create a way to implement the plan
- Get approval for the updated plan
- Change the bylaws if necessary
- Distribute the new plan

## Priority Six: Network-wide Electronic Resources

In order to address the burgeoning usage of electronic materials the Public Services will take the lead on looking to creating a Network-wide e-materials collection development policy or best practices document.

**Goal:** Discover a method to increase utilization, improve the customer experience, and increase acquisitions fairness throughout the Network.

**Project Lead:** Corey Christians

### Progress:

- Conduct initial research into what potential problems may be resolved Network-wide.
- Get approval from the Steering Committee to pursue a solution with the Public Services Committee
- Work with Pub Serv to define problems.
- Create a subcommittee to create a plan
- Pub Serv approve plan
- Steering Committee
- New plan is implemented.

## Priority Seven: SirsiDynix Supported Servers End-of-Life

After a certain amount of time vendors will no longer support hardware because it is considered outmoded. In other words parts become hard to find because they are no longer manufactured. Our servers will have this problem as of May 31st, 2016.

**Goal:** Have a solution in place to deal with outmoded hardware.

**Project Lead:** Corey Christians

### Progress:

- Determine differing solutions to the problem considering we may be on a new ILS in two years.
- Present the solutions to the Executive Committee
- Present the solutions to the Steering Committee
- Analyze which option is superior based on cost and stability
- Purchase any equipment that is required
- Migrate data and go into production

## Priority Eight: Implement BC Visibility

BlueCloud Visibility is a new product by SirsiDynix which converts our online catalog to a linked data model. This will make our records visible in search engines such as Google.

**Goal:** Implement BC Visibility

**Project Lead:** Chanel Wheeler

### Progress:

- Receive a quote from SirsiDynix
- Get approval for the purchase
- Receive an implementation plan from SD
- Offload our bibliographic database to SD to be processed.
- Test the implementation.
- Go Live
- Advertise the new service

# Prioritization

## Priority Nine: Implement Blue Cloud Cataloging

Blue Cloud Cataloging will allow library staff to access Symphony cataloging from a web browser. The new product should have significant user interface improvements above the cataloging section in Work Flows.

**Goal:** Fully implement Blue Cloud Cataloging (BCC)

**Project Lead:** Chanel Wheeler

- Upgrade Web Services so we can use BCC
- Configure Web Services for the new service
- Test BCC to see how it works
- Create documentation
- Activate it for a test library to see how it works in a production environment
- Conduct a training session for all YLN users
- Activate it for the remaining libraries

## Completed Projects CY16

Draft an RFP for a new Integrated Library System

Migrate vhosts from VMWare ESXi to Microsoft HyperV

## Cancelled/Postponed Projects CY16
